Ph. (02) 9750-4372, Int. +61-2-9750-4372

FAX. (02)9750-9406, Int. +61-2-9750-9406

E-GPA-1.5 & E-GPA-1.5-H

E-GPA-1.5 & E-GPA-1.5-H evolved from our GPA-1.5 into a Eurocard 1.5W monitor Amplifier.

The suffix 'H' is for Headphone and by inserting a Stereo headphone jack into the socket, this will mute the front panel speaker and override the electronic muting.

These Amplifiers can have the front panel speaker disconnected and power an external speaker, nominal 8 ohms. These amplifiers will drive any speaker as the amplifier is stable under any load from short circuit to open circuit. These Amplifiers are impedance protected.

Full power is derived from a single +26V supply while the amplifiers will operate from 12V to 32V.

Both Amplifiers have a yellow LED that is illuminated during mute, mute can be provided by the application of a positive voltage to the +mute terminal or 0V applied to the -mute terminal.

Call J.B. Sound Industries Pty. Ltd to discuss your requirements.
