

## ULTRASONE HFI-15G with S-Logic™

### Short description:

Supra-aural headphones with  
**S-Logic™ Natural Surround Sound**  
Free demo-CD enclosed

### Technical specifications:

S-Logic™ Natural Surround Sound  
Reduced magnetic field emissions (LE and ULE model)  
Dynamic principle  
Frequency range 20 Hz - 20.000 Hz  
Impedance 32 ohms  
Sound pressure level 90 dB

Weight (without cord) LE 85 g, ULE 110 g  
3,5/6,3 mm gold-plated plug

2 year warranty  
Long-term availability of replacement parts  
German technology

### S-Logic™ Natural Surround Sound

The HFI-15G is a light high-quality headphone with 3D sound characteristics. This effect is a result of ULTRASONE's **S-Logic™ Natural Surround Sound**.

### Safe-hearing protection

The HFI-15G is the successor of the HFI-15. „G“ stands for the German word for “hearing protection”. Due to the special construction the user perceives the same volume with a lower dB output of up to 40% (3-4 dB), thereby the risk of hearing defects may be reduced enormously.

### Reduced Magnetic Field Emissions

As all the ULTRASONE products the HFI-15G has a strongly reduced radiation. It is available in two reduction levels: the LE model (= low emission) offers a reduction of up to 60%, the ULE model (=ultra low emission) of up to 98% in comparison to ordinary headphones. For the only headphones worldwide, these facts have been certified by the “TÜV-Süddeutschland” (Association for Technical Inspection) and IGEF.

### Best used for

Yes indeed, it looks like hundreds of its fellows in the store. But please don't miss experiencing this innovation – you won't believe what's possible today in headphone development of sound quality. This is the world's smallest headphone with a really functional S-Logic™ Natural Surround Sound System. Software game manufacturers use these headphones for testing the sound parameters for computer games. No other system like S-Logic™ takes you inside your DVD movie or your PC game. If you are watching your DVD movie on a PC or with a home cinema audio set, just plug in your HFI-15G and you are part of the movie.

Due to its small size and its low weight, the HFI-15G is also ideal for mobile applications (walkman, MP3-player).

**Let us convince you! Test the efficiency of this surround sound headphone with the included CD!**
